

ActiveState Secure Containers

Secure your containers from end-to-end
using our custom, low-to-no vulnerability
container image service

Container Development is Inherently Risky

Endless CVE Management

Scanners are lighting up with CVEs, pulling teams away from critical value add work.

Growing Attack Surface

Containers in public repositories have become bloated, creating an increased attack surface.

Compliance Headaches

A lack of provenance makes it challenging to verify that every component is what it claims to be.

ActiveState Secure Containers Keep You Safe

Low-To-No CVE Container Images

Minimal, hardened images for popular languages and apps built from source

Delivered to CI/CD Pipelines

Images come with full provenance, and are delivered directly via private registry

End-to-End Customization

Fully customizable using over 40 million secure application components

Managed and Remediated

All images are rebuilt regularly and maintained, with leading SLAs

Why ActiveState?

Customize For Any Use Case

Customize your container using the world's most complete catalog of secure components.

Instant Provenance and Integrity

Achieve and maintain compliance requirements with complete image provenance.

Strengthen Your Security Posture

Reduce your CVE count by 99% across every layer of your container images.

No Maintenance, No Management

Benefit from our 7-day remediation SLA for criticals and 14 days for all others.

Transparent Pricing

Unlike other secure container offerings, pay only for the open-source components you need and reuse them infinitely across unlimited container images.

Container Image Security Comparison

Container Image	ActiveState Node :latest	Community Node :latest
 Vulnerabilities Last scanned 18 hours ago	No Vulnerabilities 	62 Total 
 Vulnerability SLA We fix your image when a serious vulnerability is discovered	 7 Day SLA	 Community updates only
 Image Size Smaller images deploy faster.	 43 MB	 121 MB
 Total Components Higher count increases risk.	 42	 120
 Update Frequency	 Daily	 Every 9 days
 Customization	 Unlimited Unique Builds Based on your component pool	 DIY Component Installation

Try ActiveState Secure Containers Free!

Choose Your Technology

Choose your starting base image, required packages, configurations, and more.

We'll Handle the Build

ActiveState does the heavy lifting; we'll build your container faster than anyone else in the industry.

Deploy to Production

Access your image from a private registry and watch your CVE count drop to nearly zero.

To start your free custom container build, contact your ActiveState account team or [reach out to us](#).
